DETAILED ACTION

1. Applicants' Response to Office Action, received 25 October 2007, is acknowledged.
Claims 1, 2, 3, 4, 5, 6, 7, 8, 9, 11, 21, 22, 23, 24, 25, 26, 28, 29, 31, 32, 34, 35, 37, 38, 39, 40, 46, 47, 48, 49, 50, and 51 have been amended.
2. Claims 1-51 are pending and under consideration.

Rejection Maintained

3. The rejection of claims 1-51 under 35 U.S.C. 112, second paragraph, indefinite for "functionally equivalent variant", is maintained for reasons of record.

Applicants argue that the amendments of the claims obviate the rejection by replacing the term "functionally equivalent variant", with another term "immunologically cross-reactive with and has at least substantially the same function as".

The examiner has considered applicants' argument, but does not find it persuasive. As newly amended, the claims are drawn to sequences which "comprises a functionally equivalent variant which is immunologically cross-reactive with and has at least substantially the same function as the original polypeptide of SEQ ID NO:1". This replacement phrase also is indefinite because neither the claims nor the specification define the metes and bounds of what constitutes "substantially the same" function as the original polypeptide.

Claim Objections

4. Newly amended claim 1 is objected to because of the following informality: line 3 of step (b) "cross-reactive" should be "cross-reactive". Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As newly amended, the claim embodiments (b) and (c) appear to be exactly the same as embodiments (b) and (c) of claim 1. Clarification is required.

Examiner Observation

7. Claim 41, line 3 recites "a polypeptide as claimed claim 1". The examiner suggests that the claim read "a polypeptide as claimed in claim 1".

Conclusion

8. No claims are allowed.
